

**MR.R.L. DHARANI – ASSISTANT PROFESSOR OF LAW**

With a bachelor's in engineering (civil), followed by a transition to law with an LLB, LLM and a Postgraduate Diploma in Arbitration Law (PGDAL), my academic journey bridges both technical and legal expertise. My foundation in civil engineering equips me with an analytical and structured approach to problem-solving, while my legal studies and advanced specializations allow me to navigate complex legal frameworks. This diverse educational background supports my interdisciplinary insight, especially valuable in fields like construction law, dispute resolution and legal research. Through both my studies and professional experience, I've developed a well-rounded understanding of technical and legal challenges, particularly within the scope of arbitration and civil-related legal matters.
